Print 15 leap years from a given year.

Rules of the leap year:

1. If a year is divisible by 400 then its a leap year.
2. Or if a year is divisible by 4 and NOT divisible by 100 then its a leap year.

For example:

2000 was a leap year (divisible by 400)

1996 was a leap year (divisible by 4 and not divisible by 100)

2100 would not be a leap year (Not divisible by 400. Divisible by 4, but also divisible by 100)
