Discussions

You have to write code for two functions *print* and *take_number*. Both of them return void and take void as argument.

take_number function takes an integer (*n*) from the input

print function prints *n* stars

NOTE : Do not change anything in main function

NOTE : Do not change arguments and return type of the *print* and *take_number* functions.

Input Format

Input contains one number *n*

Constraints

$1 \leq n \leq 10$

Output Format

Output should contain *n* stars

Sample Input 0

5

Sample Output 0

Sample Input 1

1

Sample Output 1

*

Sample Input 2

C

```
1▼ #include <stdio.h>
2
3▼ void take_number(void) {
4
5 }
6
7▼ void print(void) {
8
9 }
10
11▼ int main() {
12     take_number();
13     print();
14     return 0;
15 }
```

Line: 1 Col: 1
