Discussions

*rotate\_array* function should rotate given array by number of elements mentioned.

Complete code for *rotate\_array* function and use that in main to achieve following output from given input. Please do not change number of arguments or their types. Also do not change return type.

Please note that this problem is different from previous problem in constraints. Here number rotations can be more than length of the string.

Input Format

Input will contain 2 lines.

First line will contain 1 string of characters (may have space and tabs).

Second line will have a number n. String needs to be rotated by n characters.

Constraints

$0 < \text{length of string} \leq 10000$

$0 < \text{number of characters to rotate} < 1000000$

Output Format

Output should have only one line containing string of characters (including space and tabs from input).

Sample Input 0

```
I am a student of DDU.  
6
```

Sample Output 0

```
f DDU.I am a student o
```

Sample Input 1

```
I am a student of DDU.  
1
```

Sample Output 1

```
.I am a student of DDU
```

Sample Input 2

```
I am a student of DDU.  
2
```

Sample Output 2

```
U.I am a student of DD
```

Sample Input 3

```
I am a student of DDU.  
0
```

Sample Output 3

```
I am a student of DDU.
```

Sample Input 4

```
I am a student of DDU.  
22
```

Sample Output 4

```
I am a student of DDU.
```

Sample Input 5

```
I am a student of DDU.  
21
```

Sample Output 5

```
am a student of DDU.I
```

Sample Input 6

```
I am a student of DDU.  
44
```

Sample Output 6

```
I am a student of DDU.
```

Sample Input 7

```
I am a student of DDU.  
28
```

Sample Output 7

```
f DDU.I am a student o
```

## Sample Input 8

```
a
999999
```

## Sample Output 8

```
a
```

C

```
1▼ #include <stdio.h>
2  #include <string.h>
3  #include <math.h>
4  #include <stdlib.h>
5
6  void rotate_array(char str[], int number_of_chars_to_rotate)
7▼{
8      // Write code here to rotate characters in the array by number_of_chars_to_rotate
9      // Use array traversing method
10     // Do not use array indexation method or pointer offset method.
11 }
12
13 int main()
14▼{
15
16▼     /* Enter your code here. Read input from STDIN. Print output to STDOUT */
17     return 0;
18 }
```
